CMMI Maturity Level 5

With a deep commitment to quality, Diyar has had a history of driving towards attaining world-renowned achievements and standards, with the recent addition of CMMI Maturity Level 5.

This strong drive for growth supports Diyar's vision of improving performance and cultivating innovation.

CMMI Level 5 is a large step among many that reveals a rooted commitment to quality and self - improvement.

CMMI

The Capability Maturity Model Integration (CMMI)® is a globally-recognized set of best practices that enable organizations to improve performance, key capabilities, and critical business processes in software development and system integration.

CMMI was developed at Carnegie Mellon University, USA (CMU), the worldwide leader of software engineering. CMMI is required by many US government contracts including US Department of Defense for software development. CMMI is administered by the CMMI Institute and is registered at the US Patent and Trademark Office (PTO).
